Track hardware and software assets; automatically group devices based on location, etc. Track device repair history to identify problems and defective units.

MobiControl

NEW
v902

Maximize your Mobile Field-Force

• Reduce Total Cost of Ownership

Automate processes to increase productivity, reduce labor costs and maximize your ROI

• Increase Productivity

Minimize downtime, shorten training curves, increase user adoption, reduce support and labor costs and simplify device management.

• Reduce Security Risk

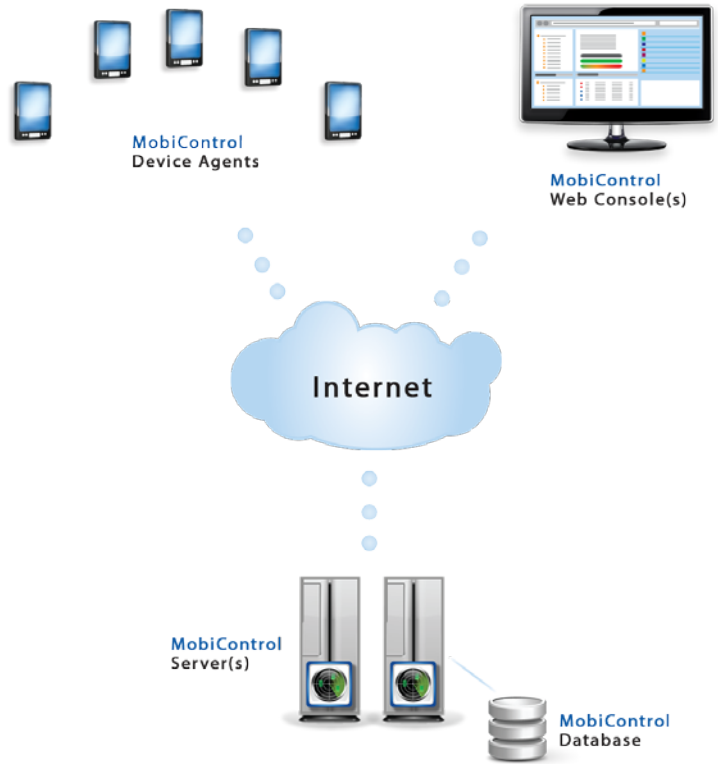

AES-256 full device storage encryption using FIPS 140-2 certified algorithms to protect your sensitive data, Active Directory based user authentication, Application Run Control, Device Lockdown (Kiosk mode), Hardware Feature Control & much more. Advanced security policies provide administrators with granular control over how mobile devices are used and data is accessed as well as help achieve PCI, SOX and HIPAA compliance.

• Benefit from Open Standards

Built using open industry standards with no need for proprietary hardware or software.

• Protect Your Investment

MobiControl supports all Windows-based mobile and desktop computing devices that operate over any wired or wireless network (e.g. WiFi, GPRS, CDMA, EDGE, UMTS, LTE).

System Requirements

Manage any mobile device or computer running any Microsoft mobile or desktop Operating System.

Compatible with all devices/computers running Microsoft CE, Pocket PC, Windows Mobile, Windows 2000, Windows XP, Windows Vista, and Windows 7 (32-bit or 64-bit) Operating Systems. Now supporting Windows Embedded for Handhelds.

Manage Mobile Deployments Over Any Network Topology

- ✓ WiFi or other wireless network
- ✓ Low & High bandwidth Cellular Network
- GPRS, CDMA, EDGE, UMTS, LTE, WiMAX, etc.
- ✓ External network outside corporate firewall
- ✓ Batch mode/cradle devices
