

## Device Management Made Easy

Psion Teklogix' Mobile Control Center (MCC) provides organizations with a complete suite of integrated tools to centrally manage and control their mobile field force. Some of the tools MCC provides include: automatic provisioning of software and data; real-time remote helpdesk support and troubleshooting tools; automatic monitoring and correction of problems; automatic configuration of devices; and more. Psion Teklogix plans to continue to expand the integration of MCC with our mobile devices, offering our customers even greater value to control their devices and peripherals remotely and hassle free, hence reducing their total cost of ownership and total cost of frustration.

### FEATURES

- **File Management:** Windows File Explorer interface enabling the upload and download of files to and from devices, modifying files and folders, and viewing file properties
- **Configuration Management:** install and uninstall software, update and configure applications, manage licenses, system, network and security parameters, clone configurations, remote RF update capability, group devices and customize view filters
- **Accounting Management:** real-time logging and reporting, messenger service, list of online and offline devices and their status (installed packages, properties, ...)
- **System Management:** access device system information, remotely reboot and suspend devices, check battery levels, memory utilization and load, list of installed applications, device lock down, and stop and start processes, backup and restore device profiles
- **Remote Control and Troubleshooting:** control multiple devices simultaneously from the MCC Manager. Many Managers can connect to single device remotely, modify registry, network and security parameters, Windows File Explorer to manage files. Supports data compression, optimized TCP streaming for near real-time experience
- **Networking:** auto-discovery feature to discover remote devices, get network properties from remote devices, set SSID, WEP keys, and IP configuration, scheduling feature, works well over LAN and WAN
- **Miscellaneous:** Supports all Psion Teklogix and some non-Psion Teklogix Windows-based terminals. Built for performance, scalability and fault tolerance

### ADVANTAGES

- Reduce support, maintenance and training costs. Manage local and remote devices, all from a single management console. Distribute software packages easily including application installation, configuration and patch updates
- Maximize uptime and productivity. Detect problems and troubleshoot them while the devices stay in the field
- Enhance mobile security and setup. Enforce security policy for mobile devices. Configure encryption and device lock down to business needs
- Track mobile assets from a single management console, and generate reports and charts
